IN THE SPECIFICATION:

Page 11, line 14, delete "widow" and insert --window --.

Page 18, line 7, delete "widow" and insert --window --.

Page 18, line 12, delete "widow" and insert --window --.

IN THE CLAIMS:

Amend the Claims as follows:

1   1.   (Once Amended) A system for generating separate high-luminance viewing windows

2   on a display device, comprising:

3   a control device coupled to said display device for processing input signals and

4   providing said processed input signals to said display device; and

5   a window generator coupled to said display device for generating window [widow]

6   information and applying said window information to said control device to generate said

7   separate high-luminance viewing windows on said display device.

1   4.   (Once Amended) The system of claim 3 further comprising a processor device which

2   provides control signals to said window generator, said control signals including selective

3   position and size information for said high-luminance windows.

1   7.   (Once Amended) The system of claim 6 wherein said limiter device receives and

2   limits said window signal [pulse] to generate and provide an analog window signal to said

3   video amplifier.
